

Surat City Profile

8th
Largest in
India as per
population

4th fastest
growing city
globally

Termed as
Economic
Capital of
Gujarat

9/10 Diamonds in
the world are cut
and polished here

40% of nations total
man-made fabric &
28% of nation's total
man-made fiber
production

- Area: 326.5 sq.km
- Population: 2011- 44.6 Lakh (SMC)
- Density : 138 Persons/ Ha (Census-2011)
- Population Growth Rate : 59% increase in a decade (2001-2011)
- Admin Zones : 7

- 2nd largest in Gujarat and 8th largest In India
- Fastest growing city in India
- Large number of migrant populations in the city from various parts of India due to economy generating textile and diamond industries

Rapid Growth in Population

2001 – 28 Lakh
2011- 44.6 Lakh

Inadequacies in the road network

Incomplete Road Network
Constraints – River, Canal, Khadi,
Railway Line, encroachment

Rapid Growth in Vehicles

16.7 Lakh vehicle added in last 10 years

Increase in Congestion and Travel Time

High City Mobility

38 Lakh Passenger trips/day

High dependency on Auto rickshaw and Inadequate Public Transport

Journey of Surat Public Transport

Before 2007

40,000 auto rickshaws operating as public transport!

In 2007

Introduction of Rainbow City Bus services in 2007
Challenge for Surat to create Sustainable High Quality Public Transport

To overcome these issues Surat Municipal Corporation has introduced world class public Transport system with Smart tools (ITMS & AFCS)

January 2014, BRTS

November 2016, BRTS

May 2018, HMC

Vision, Strategic Goals and Policy Directions

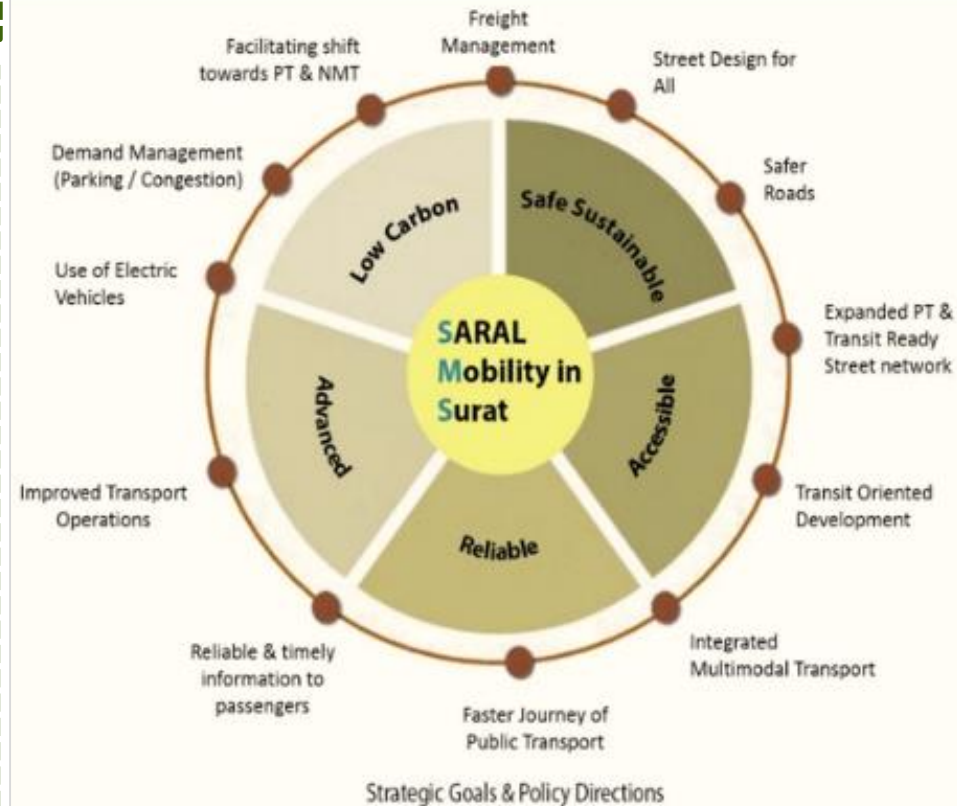

The vision SARAL in Indian languages means “Simple” which also implies mobility being Easy, Convenient and Accessible aimed towards a healthy living environment.

The vision “SARAL Mobility 2046” is achieved through five strategic goals defined as:

1. Improving quality of life of people by providing for a Safe and Sustainable transport system
2. Supporting the economic growth in the city by enhancing Accessibility for people and goods to major activity centres.
3. Ensuring efficient connections by providing Reliable multi-modal travel options
4. Optimising transport system operations and enhancing travel experience of people through Advanced Technological Applications in transport.
5. Contributing to the environment by promoting Low carbon mobility

Vision, Strategic Goals and Policy Directions

'SARAL Parivahan, Samridh Janjivan'

SARAL – Safe Accessible Reliable Advanced and Low-carbon mobility in Surat

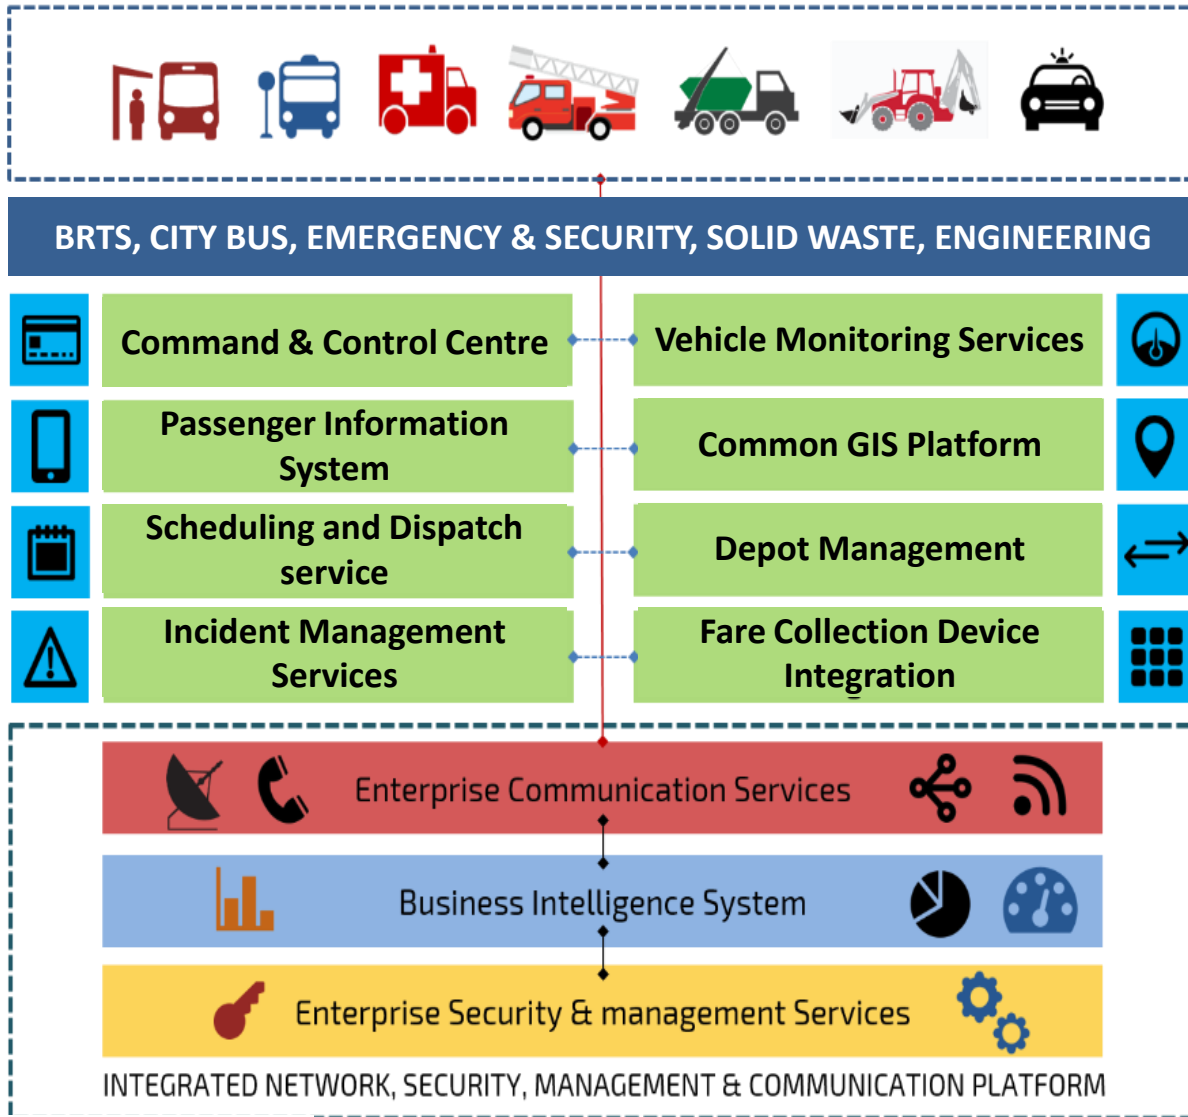

Surat Adopting Smart Tool

SMC is implementing a city wide integrated system – “**Intelligent Transit Management System**” (ITMS), to manage diverse set of transportation needs for the city – this includes: (a) public transport and (b) vehicles related to civic services like Solid Waste Management, Drainage, Heavy Engineering, Emergency Services (Fire & Ambulance) etc.

Automatic Fare Collection System (AFCS) project aims to automate the fare collection mechanism and technology within Surat’s transport ecosystem (BRTS & City Bus Services) and enhance operational capability, citizen’s satisfaction, reliability and ease of operations for its services offered through various transits.

Integrated Transit Management System Framework for Surat City

Project Scope

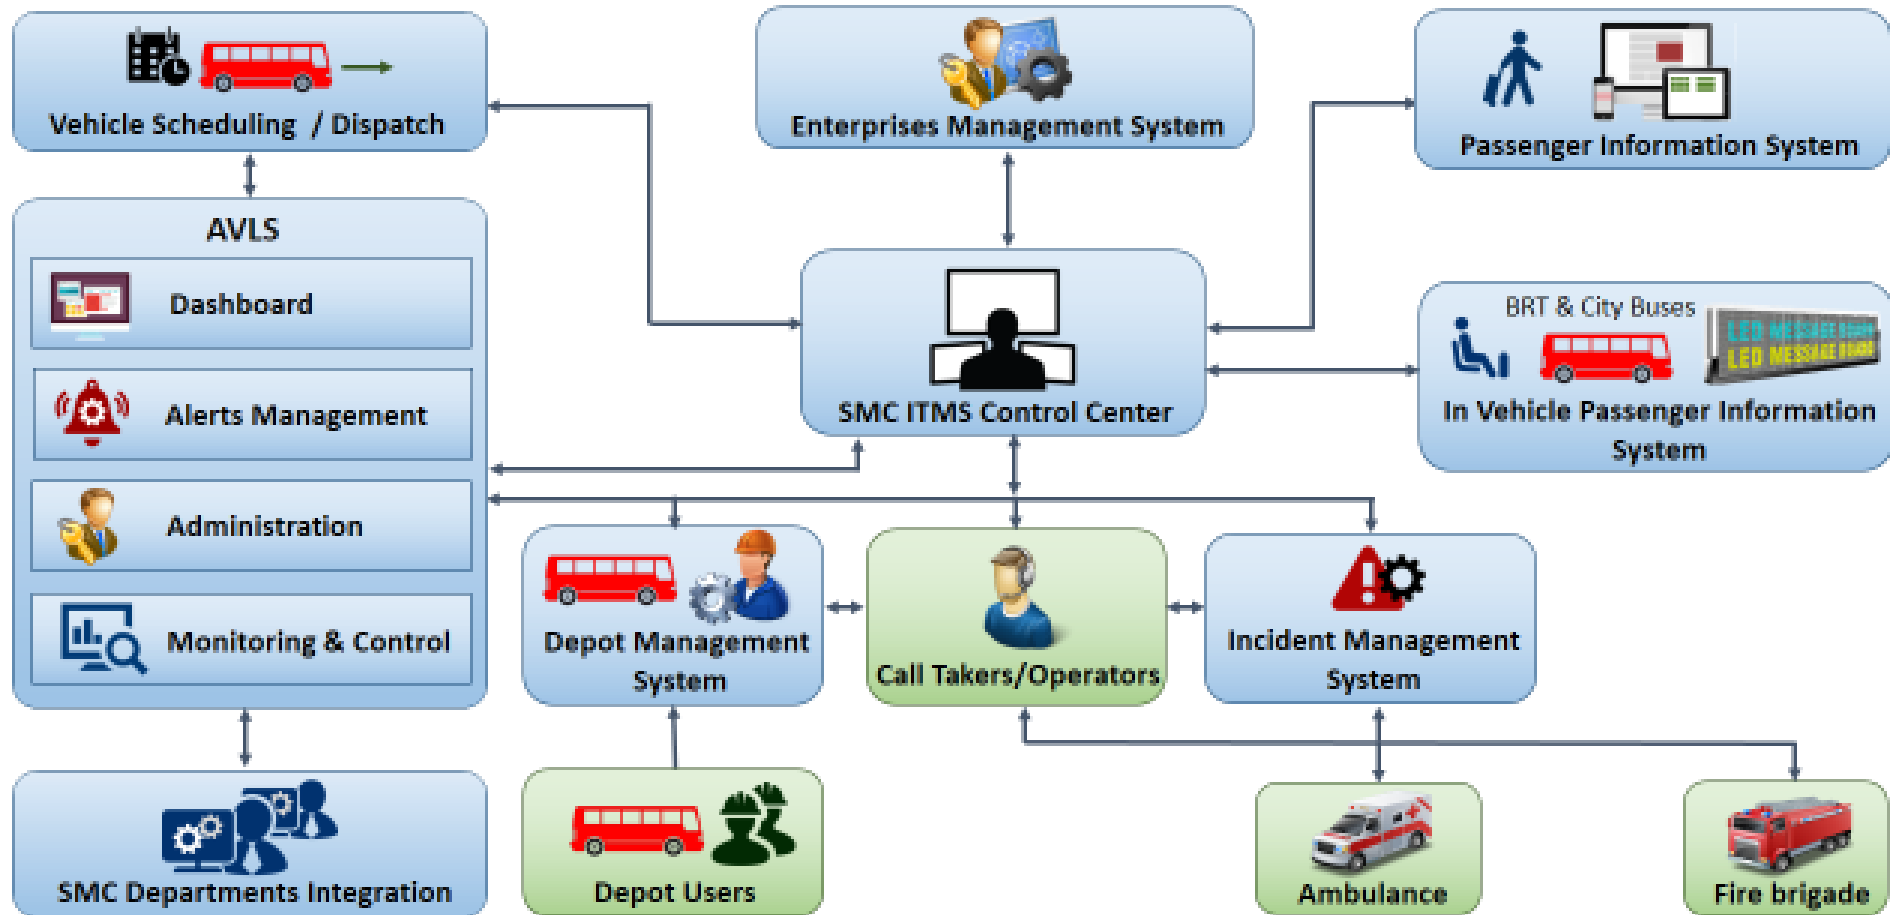

Hardware

- 153 BRTS stations
- 275 City Buses
- 166 BRTS Buses
- 6 Depots
- **535 Department Vehicles**
- **50 Emergency Vehicles**

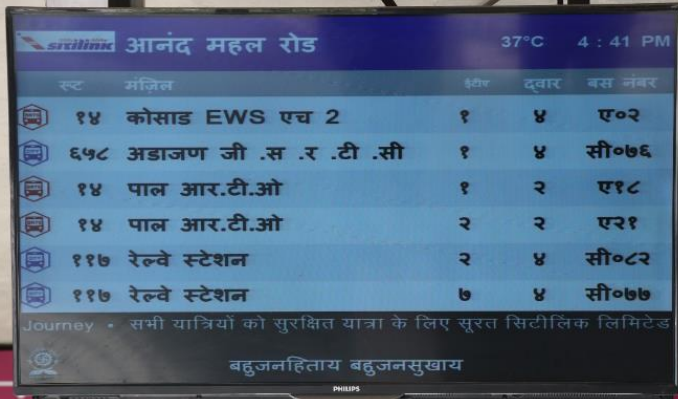

Software

- AVLS
- DMS
- EMS
- Website
- VPS
- IMS
- PIS
- Helpdesk

ITMS - Department Vehicles

Surat Municipal Corporation has expanded the scope of ITMS by including department vehicle and emergency vehicles.

BENEFITS

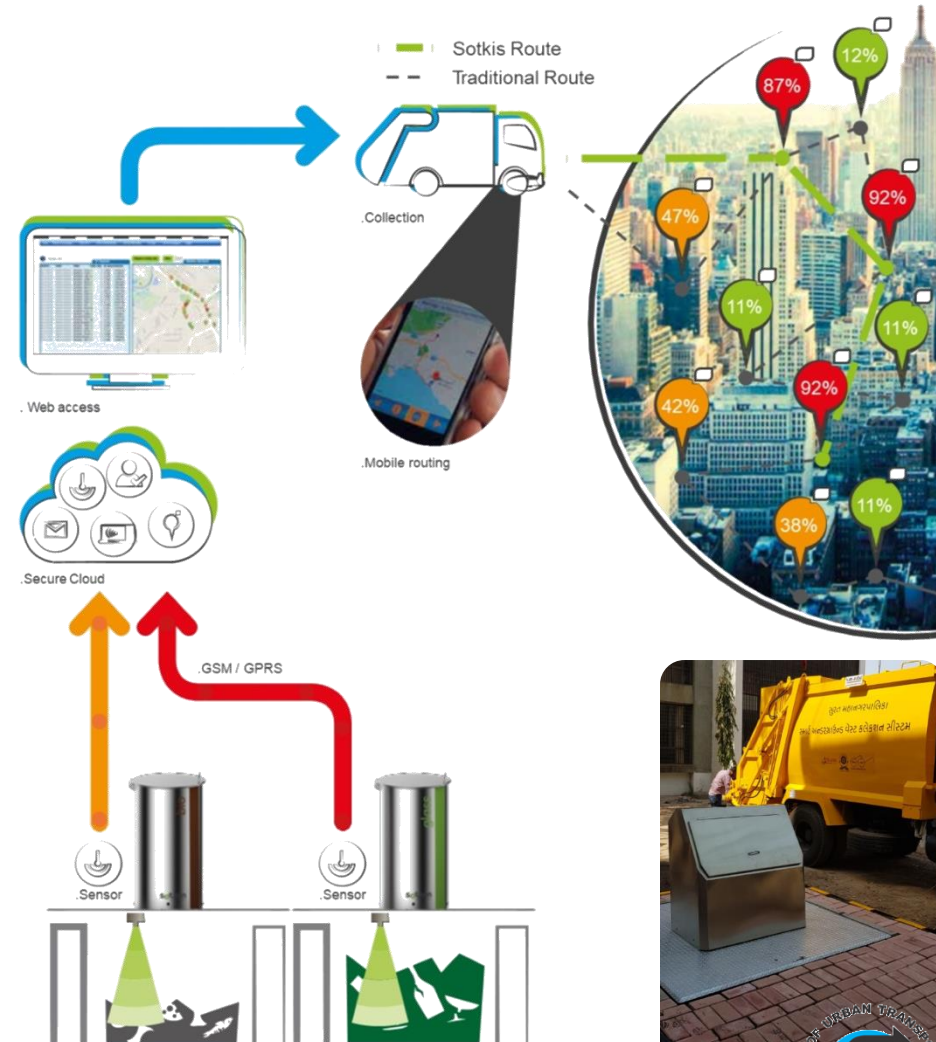

- Real time guidance to Emergency vehicle (Fire and Ambulance) to destination with less traffic and short route
- Optimization in Kilometer and fuel saving
- Better efficiency in using vehicles
- Operator Billing through System

| Type of SMC Vehicles | Count |
|--|-------|
| TIPPER TRUCK | 109 |

| OIL TANKER | 1 |

Use of ITMS for Solid Waste Management

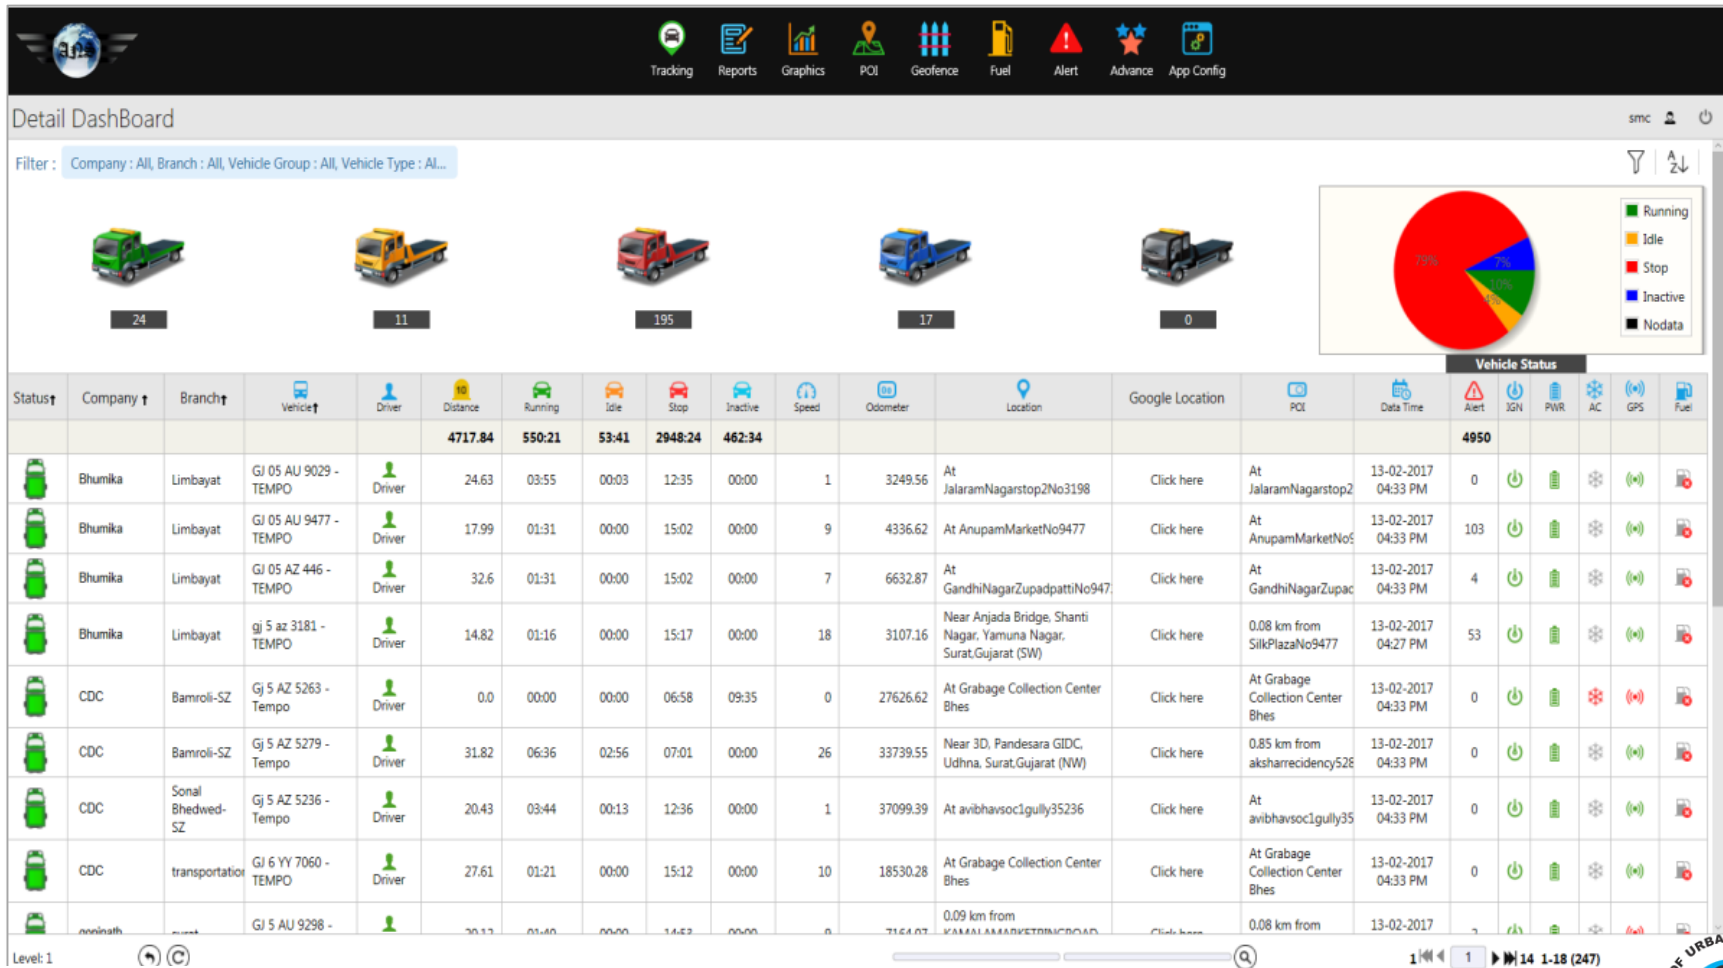

- **SMART DUSTBIN:** SMC has identified 75 container spots which will be upgraded with smart underground dustbins as a pilot project. It includes automatic emptying of underground dustbins and their cleaning.
- The ITMS will provide the notification regarding the Bin capacity left and according to that nearest vehicle will be assigned to lift the waste with route. This will optimised the operation and maintenance cost.

SMART UNDERGROUND WASTE COLLECTION SYSTEM WASTE MANAGEMENT SYSTEM

Use of ITMS for Solid Waste Management

- Door to Door Waste Collection:** Radio Frequency Identification (RFID) Tag is installed on all Door to Door vehicles. These automatically identify the vehicles at transfer stations and also record their weight automatically, which are monitored at central command center – SMAC Center.
- ITMS helps to reduce cost of operation about 8%.

Top/Last 5 Stops and Route - Ridership and Revenue

Hour basis Ridership and Revenue

Mobile Application & M Ticketing

Sitilink mobile application offers citizen to plan their journey in an efficient way. Surat Sitalink application provides multiple options listed as below:

- Journey Planners
- M-ticketing
- Route and Stops Information
- Route Map

SMC Department vehicle application is developed for the real time vehicle tracking and reporting. Also used for the operator billing based on AVLS Data.

Sitilink Supervisor application is developed for Sitilink operations.

Activities at Control Centre (SMAC Centre)

ITMS

- Bus Bunching
- Route violations
- Speed violations
- Non stoppage violation
- Stoppage violation
- Schedule deviation
- Trip not initiated
- Bus Allocation
- Bus Accident & Breakdown Monitoring
- Centralized Push Message
- Two way Communication (BDC to CC)

AFCS

- Management information System (MIS)
- Reporting through Dashboard

Citizen complaint & Incident management system (transit) using toll free number (18002330233) with Interactive voice response system (IVRS) at Control Centre (SMAC Centre)

SMAC Centre - Existing

IT MAC - Proposed

- Integrated Fare (Single ticket to travel in BRTS, City Bus and HMC)
- Integrated Schedules (schedules prepared considering integrated corridors for BRTS, City bus and HMC)
- Passenger Information System(In Bus and Station): Passenger information such as NSI (next stop indicator), Bus estimated time of arrival, etc.
- Passenger Announcement System (PAS)
- General Transit Feed Specification (GTFS – Integration with Google)
- **SMC Department and Emergency vehicles integration**

- **Bus Station analysis (Peak - off Peak Load)**
- **OD Analysis, Passenger Transfer Analysis**
- **Route wise and Bus wise Conductor analysis to improve the revenue collection**
- **Driver Analysis to improve the reliability**
- **Accident and Breakdown analysis (Operator wise)**
- **Schedule Optimization (Route direction wise and peak hour wise)**
- **Trip and Schedule Adherence Analysis (Route and Operator wise)**
- **Operator wise and Bus wise Schedule Arrival/Departure and Actual Arrival Departure helps to improve reliability**
- **Route Performance Analysis (Route wise - Ridership, Revenue, vehicle utilization, dead kilometer, revenue kilometer)**
- **Interchange Station & Infrastructure requirement (ETM, Turnstile, Staff, etc. requirement)**
- **Guiding Emergency Vehicle (Ambulance and Fire Fighter) for Short and Less traffic route to reach incident point/hospital.**

CITIZEN

- **Faster Ticket Issuance:**
 - ⑩ Shorten payment time for QR ticket.
 - ⑩ No need to prepare change for Surat Money Card
 - ⑩ Passengers don't need to calculate the fare
 - ⑩ Mobile Ticketing
 - ⑩ Increased reliability and User satisfaction
- **Boarding & alighting complete with one tap for Surat Money Card:**
 - ⑩ simple & speedy for everyone (barrier free)

IMPROVED OPERATIONS

- **Automatization of fare calculation/collection:**
 - ⑩ Highly flexible fare structure
 - ⑩ Accurate and strict fare collection
 - ⑩ Reduce manual fare collection.
 - ⑩ Improve on-time operation by shortening passenger boarding & alighting times
 - ⑩ Lower equipment & operation cost by reducing cash handling
 - ⑩ Single established system across the operators
 - ⑩ Transit violations monitoring such as speed violation, missed stop violations and rou.
 - ⑩ deviation

SMC/SSCDL

- **Data Driven Decision Making**
- Passenger/origin-destination/sales assisting in better
- Bus services and Frequency planning including last mile connectivity.
- Reduction in personal vehicles with better utilization of Public transport infrastructure
- Aid multi-modal integration

SOCIETY

Shift from private vehicle to public transportation:

- reduce traffic congestion
- ease air pollution
- provide more business opportunities to the area around public transportation

Surat Money card :

- Contribute to environment by reduce paper tickets for AFCS system
- Support other SMC services such as Tax, Library, Swimming Pool etc.

Unique Features

- **Integration of General Transit Feed Specification (GTFS)** – 2nd city to share integrate transit data with Google.
- **Integrated schedules** for BTS, City bus and HMC to increase the reliability and frequency of service.
- **Fare integration** provides single ticket single journey between services.
- **Operator Billing** (Penalties based on violation).
- **Employ Management** (Driver, Conductor verification).
- **Common Card payment** to avail SMC service such as Public transit facilities, Tax, SMC swimming pool, Library, etc.
- **Smart dustbins and Door to Door waste collection project** is integrated with ITS system under Swatch Bharat Mission.
- Integration of **SMC Departmental Vehicle and Emergency vehicle** with ITMS System.

Unique Features

Work (Mughal Sarai)

THE TIMES OF INDIA

City commuters to get real-time information on BRTS buses in Surat on Google maps

TNN | Jul 10, 2018, 08:29 PM IST

Google Maps

SURAT: Residents in the diamond city will be able to get real-time information on the arrival of the buses operated by Sitilink on the BRTS routes and arterial routes on the Google maps, making it easier to plan their trips in advance.

The Surat Smart City Development Limited (SSCDL) has teamed up with Google to provide easy access to the arrivals and departures of the Sitilink buses through Google Maps.

The commuters will have to type the two locations in the Google maps to get the information about the buses running on the routes and their time of arrival. Google transit will automatically update the times in line with the new conditions. The arrival times based on real-time information will be marked in green or red on Google maps.

Futuristic Plan

- GIS Layers integration
- Ticket vending Machines
- Third Party Wallet and UPI Integration
- Bus Station and In bus CCTV cameras
- Bus Civic Amenities at Interchange Station
- Emergency Service Integration
(Ambulance, Fire, etc.)
- Integration with ITCS
- Integration with third party cab services
(Ola, Uber, etc.)
- Integration with SMC initiative - Pink Auto

Ticket Vending Machine

GIS Layer Integration

CCTV Camera in Bus
